

Procedure for dealing with Medical Problems/Conditions

Parents are advised in the Members Handbook and on the Noticeboard, that injuries or medical conditions must be advised to the Session Leader prior to the start of any session.

In the case of permanent conditions, new members are asked to detail issues on the Membership Form, giving all relevant details.

In each case, the Head Coach or the Session Leader ensures that the advice is recorded against the swimmer's name on all Registers and, if necessary, advises other coaches at Meetings and/or poolside.

The swimmer's records are similarly annotated and any review of performance will include a consultation, including Parents where relevant, regarding current medical conditions. In the case of injuries, the Club may call upon the Club's Physiotherapist for either treatment or advice.
